THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

Election/Restrictions

Claims 34-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8-10-2009.

In the reply dated 8-10-2009, applicant clearly elected group I, described in the Requirement for Restriction dated 6-10-2009 as claims 1-33. Further, applicant, in the reply dated 8-10-2009, chose to cancel claims 1-23 of the elected group, and added new claims 37 and 38 to the elected group. As such, the remaining elected claims 24-29 and 37-38 have been examined. Further, non-elected claims 34-36 have been canceled with applicant's authorization in the examiners amendment, below.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. DeMaster on 9-17-2009.

The application has been amended as follows:

Please replace the claims with the following:

24. A method of providing information on the likelihood of a result arising due to contamination in a method of analysis:

the method of analysis including a threshold which determines the analysis protocol to be applied to the analysis of DNA in a test sample;

the method of providing information including:

in respect of one or more negative controls, obtaining information on whether or not DNA is suggested as present in the one or more negative controls;

determining the probability of DNA being suggested as present in the one or more negative controls, the determination being based on the number of the one or more negative controls which suggest DNA is present compared with the total number of the one or more negative controls considered;

the probability of DNA being suggested as present in the one or more negative ~~controls~~ control being equated to the probability of the test sample ~~DNA samples~~ being contaminated;

the method of providing information further including:

in respect of one or more DNA samples, obtaining information on whether or not DNA is suggested as present in the one or more DNA samples ~~sample~~;

obtaining information about the quantity of DNA in the one or more DNA samples;

in respect of one or more second negative ~~controls~~ control-samples, which may be the same or different to the one or more negative controls, obtaining information on whether or not DNA is suggested as present in the one or more second negative ~~controls~~ control;

obtaining information about the quantity of DNA in the one or more second negative controls;

simulating one or more mixtures, the mixtures each being formed from a pairing of a second negative control ~~sample~~ and a DNA sample taken from amongst the one or more second negative ~~controls~~ control-samples and the one or more DNA samples;

establishing the proportion of mixtures for one or both of the following types of simulated mixture:

DNA suggested as present from second negative control sample only;

DNA suggested as present from both DNA sample and second negative control ~~sample~~;

determining a likelihood ratio in respect of a result arising which exceeds or which matches or exceeds the threshold in the method of analysis for one or both of the types of simulated mixture.

25. A method according to claim 24, wherein the method of providing further information provides information on possible errors, and the information on possible errors is an indication as to the number of the one or more second negative controls which contain a quantity of DNA above the threshold and / or the information on possible errors is an indication as to the number of ~~contaminated~~ samples which contain DNA above the threshold.

26. A method according to claim 24, wherein test samples above or at and above the threshold are subjected to a first analysis protocol and/or test samples at and below or below the threshold are subjected to a second analysis protocol.

27. A method according to claim 24, wherein a probability of achieving a given likelihood ratio is determined and such a determination is made in respect of one or more likelihood ratio levels and/or is made in respect of one or more values for the threshold values.

28. A method according to claim 24, wherein the method includes varying the threshold to give a predetermined likelihood ratio and/or predetermined probability of achieving a likelihood ratio.

29. A method according to claim 24 in which the method is applied independently to different operating organisations and/or different processing lines within organisations.

34. Cancelled

35. Cancelled

36. Cancelled

37. A method according to claim 24 in which the method includes adjusting the level of the threshold to alter the number or proportion of the one or more second negative controls on one or other side of the threshold.

38. A method according to claim 24 in which the method includes adjusting the level of the threshold to reduce the number or proportion of the one or more second negative controls above the threshold.

Claims 24-29 and 37-38 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 24 recites, "simulating one or more mixtures, the mixtures each being formed from a pairing of a second negative control and a DNA sample taken from amongst the one or more second negative controls and the one or more DNA samples; establishing the proportion of mixtures for one or both of the following types of simulated mixture: DNA suggested as present from second negative control only; DNA suggested as present from both DNA sample and second negative control; determining a likelihood ratio in respect of a result arising which exceeds or which matches or exceeds the threshold in the method of analysis for one or both of the types of simulated mixture".

This feature, combined with additional claimed subject matter, overcomes the prior art of record.

Regarding 35 U.S.C. 101, claim 24 recites a simulation of mixtures, disclosed in the specification as performed by MATLAB. MATLAB is a commercially available computer simulation application; therefor, carrying out the invention requires the use of a computer which involves a tie to another statutory class.

US 2006/0281134 to Love discloses similar subject matter, but does not disclose claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
